index 2003

Subject

14–19: opportunity and excellence, Government report, 33C, 88C

Acid–base chemistry, students' ideas, 28
Active learning lecture, example of, 108
Air analysis, 154
A-level experiment, starch–iodine reaction, 135
A-level investigations, 161
Ammonium chloride, demonstration, 80
Anaesthesia, 77
Analytical chemistry, 97, 154
Analytical chemistry, forensic science, 51
Aromatic ring, substitution mechanism, 129
As if by chance, Mond process, 91C
AS-level, exam, 16, 38L, 65L
Atkins diet, chemistry course, 142C
Atomic nuclei, radioactive ion beams, 13

Benzene, ring structure, 20
Biological weapons, 6C
Bologna Declaration, 38L, 144C
Book reviews
  Analytical, undergraduate, 111, 165
  Biochemistry, A-level, 139
  Biochemistry, undergraduate, 27, 55
  Chemistry, A-level, 27, 110, 165
  Chemistry, GCSE, 83, 110, 139
  Chemistry, Key Stage 3, 54
  Combinatorial chemistry, undergraduate, 111
  Elements, general, 55
  Environmental chemistry, undergraduate, 110
  Inorganic, undergraduate, 83, 165
  Medicinal chemistry, undergraduate, 55
  Organic chemistry, undergraduate, 54, 83
  Molecular modelling, undergraduate, 165
  Science, GCSE, 54
  Science, general, 111
  Science teaching, general, 27, 111, 166
  Science quotations, dictionary of, 166
  Science and warfare, general, 166
  Surface chemistry, undergraduate, 55
  Synthetic chemistry, undergraduate, 139
  Watson, James, 139
  Web-based biosciences, 110
Born–Haber cycle, 79
Buckminsterfullerene, model, 121L
BZ, nerve agent, soundbite, 7C

Carbon dioxide, reaction with phenolphthalein, 38L
Carbon dioxide, greenhouse gas, 38L
Ceramics, dielectric materials, 109
Chemical bonds, students' misconceptions, 93C, 121L
Chemical concepts, 93C, 121L
Chemical garden, 88C
Chemical sensors, 68
Chemical weapons, 6C
Chemiluminescence, demonstration, 39
Chemistry demonstrations, 12, 39, 66, 96, 122, 150
Chemistry trails, 9C, 62C, 119C
Chemlingo, 35C, 147C
Childs, Peter, RSC award winnner, 5C
Chlorophenols, organohalogens, 41
Chloroquinine, anti-malarial, 158
Chromatography paper, in drug discovery, 53
Citaro bus, fuel cell-powered, 118C
Clinton, Sandra, Salters' Chemistry Teacher, 3C
Clock reaction, demonstration, 96
Coatings, paints and industrial, 123
Combinatorial chemistry, dynamic, 109
Conduting polymers, applications of, 70
Continuing professional development, 127
Cotton, dyeing of, 151
Crystallography, Kathleen Lonsdale, 20
Curare, muscle relaxant and poison, 74
Cyclodextrins, supermolecules, 67

Diamondoids, synthesis of, 119C
DNA, discovery of, 31C, 89C
DNA, detection technology, 109, 164
Diagnostic medicine, application of ion beams, 15
Distillates, chemical education, 26, 82, 138
Distillates, chemistry, 53, 109, 164
Doebner, Oscar, 46
Downing, Jo, Salters' Chemistry Teacher, 3C
Dyestuff chemistry, 46, 101, 151

Electrochromic materials, smart windows, 103
Elements bingo, 95L
Elements, abundance of, 23
Emulsifiers, role of, 104
Energy changes, 78
Enzymes, properties of, 135
Ether track, demonstration, 122
Exam standards, AS-level, 16, 38L, 65L
Eurobachelor degree, 61C
European Credit Transfer System, 61C, 144C
European HE science, 143C

Fentanyl, soundbite, 7C
Fenn, John, Nobel prizewinner, 4C
Fischer, Otto, 46
First Law of thermodynamics, undergraduate course, 18
Flame test, demonstration, 150
Fleming, Alastair, RSC Schools Education Award winner, 90C
Fluorescent materials, data storage, 53
Forensic science, case study, 49
Freezing point of solutions, 104
Fuel cells, 118C

Galantamine, soundbite, 145C
Gases, chemistry trail, 9C, 62C
Gill, Ellis, Schools Education Award winner, 90C
Global warming, teaching of, 82
Glycyrrhizin, Sars treatment, 164

HE chemistry, provision of, 86C, 121L
HE chemistry, issues affecting uptake, 87C, 140
HE white paper, 30C, 58C
HEFCE, HEFCE–RSC dinner meetings, 86C
HEFCE, Research Assessment Exercise, 3C, 30C, 114C, 115C, 116C
History of chemistry, acids and bases, 28
History of chemistry, aromatic substitution, 129
History of chemistry, curare, 74
History of chemistry, DNA, 31C, 89C
History of chemistry, dyes, 46, 101, 151
History of chemistry, Equilibrium and rates, 56
History of chemistry, Karlsruhe Congress, 112
History of chemistry, Kathleen Lonsdale, 20
History of chemistry, nickel refining, 91C
History of chemistry, x-ray crystal analysis, 20, 116C
Hollamby, Peter, RSC Schools Education Award winner, 90C
Hydrogen, fuel cells, 118C
Hydrogen–oxygen reaction, demonstration, 12

Ice cream, physical chemistry of, 105
Image of chemistry, initiatives to address, 87C
Infochem
  Acrylamide, no 81
  Antioxidants, role in plants, no 80
  Biofuels, no 83
  Catalysis, no 82
  Chemical sensor, cancer detection, no 83
  Coatings, medical implants, no 82
  Cold treatments, no 84
  Dietary factors, no 79
  Fluorous chemistry, solvents, no 83
  Folic acid, no 79
  Formula One racing, no 81
  Fuel chemistry, no 81
  Green solvents, no 82
  Nanoscience, no 82
  Nanotechnology, applications of, no 82
  Photosynthesis, no 80
  Plant stress, no 80
  Peppers, meat preservative, no 80
  Scanning tunnelling microscope, no 82
Ingold, Christopher, 129
Inspire, science teaching development programme, 60C
Intermolecular interactions, types of, 68
Iron(II) sulphate, student exercise, 11L

Key Stage 2–3, ORACLE project, 26
Key Stage 4 science, review of, 33C, 88C
Kinetics, equilibrium and rates, 56
King's College London, National Historic Landmark, 89C

Lambert review of business–university collaboration, 114
Lonsdale, Kathleen, 20

Malachite Green, synthetic dye, 46
Malaria, vaccines for, 158
Malonic ester, synthesis of, 108
Mass abundance, elements, 23
Materials, analysis of, 14
Mathematics, teaching chemistry students, 11L
May, Paul, RSC award winner, 5C
Medicinal drugs, organohalogens, 41
Modafinil, treatment for ADHD, 53
Molar abundance, elements, 23
Mond process, 91C
Muscle relaxants, 74

National Curriculum review, *Science for the 21st century*, 33C, 88C
National Historic Chemical Landmark, 89C, 116C
Nitrogen triiodide detonation, demonstration, 66
Nobel Prize, chemistry, 4C
North of the border, 8C

Organic light-emitting diodes, 71
Organohalogens, natural, 41
Olympiad competition, 115C
Outreach partnerships, funding, 86C
OUTV guide, 25

Papakostopoulos, Ezi, Salters' Chemistry Teacher, 3C
Particle theory, use at Key Stage 3, 82
Physical chemistry, of ice cream, 105
Poisons, thallium, 133
Polymer chemistry, coatings, 123
Polymer-based electronics, 70
Polymer synthesis, radical chain reactions, 42
Polythiophene, conduting polymer, 70
Postdocs, working in schools, 60C
Precious metals, chemistry trail, 119C
Prussian blue, applications of, 101, 133
Pyrolysis, new catalyst for, 109

QCA, review of National Curriculum science, 33C
Quality assurance, European proposals, 144C

Radical reactions, advantages of, 42
Radioactive ion beams, applications, 14
Reactive dyes, for cotton, 151
Research, undergraduates' experiences, 140
Research Assessment Exercise, review of, 3C, 30C, 114C, 115C, 116C
Rheology, polymer coatings, 124
Ribavirin, soundbite, 92C
Ricin, soundbite, 34C
Robinson, Robert, 129
RSC, *Exemplarchem* awards, 4C
RSC, HEFCE–RSC dinner meetings, 86C
RSC, Library and Informartion Centre, 32C, 95L
RSC, Olympiad team, 115C
RSC, Parliamentary Links Day, 116C
RSC, HE teaching award, 5C
RSC, outreach activities, 86C
RSC, response to HE white paper, 58C
RSC, response to KS4 proposals, 88C
RSC, Schools Education Awards, 90C
RSC, Top of the Bench winners, 59C
RSC, *Voice of the future*, 59C

Salters' A-level chemistry, investigations, 161
Salters' Chemistry Teacher, 2002, 3C
Salivary amylase, enzymatic activity, 135
Science on TV, students' views, 138
School experiment, ammonium chloride formation, 80
Science centres, role of, 26
Science for the 21st century, 33C, 88C
Science, National Curriculum, 26, 33C, 88C
Separation methods, chemlingo, 35
Seroxat, soundbite, 117C
Specialist science schools, 60C
Soundbite molecules, 7C, 34C, 64C, 92C, 117C, 145C
Students' chemical misconceptions, 93C, 121L
Student exercise, stoichiometry, 11L
Supramolecular chemistry, 67

Tanaka, Koichi, Nobel prizewinner, 4C
Teaching chemistry, real-life contexts, 82, 84
Thallium, chemistry of, 132
The future of higher education, HE white paper, 30C, 58C, 114C
Thermodynamics, 11L, 18, 78
Thermodynamics in context, undergraduate course, 18
Thin film transistors, 72
Tributyltin hydride, in radical chain reactions, 44
Turla, Esme, Salters' Chemistry Teacher, 3C

Undergraduate experiment, dyes, 48, 102, 153
Undergraduate experiment, spectroscopy, 131
Undergraduate experiment, starch–iodine reactions, 135
Undergraduate practicals, enhancing students' thinking, 138
Undergraduate teaching, active learning, 107
University–business links, 114C
University of Abertay Dundee, forensic science course, 49
University funding, 2C, 30C, 114C, 115C, 116C, 143C
University of Keele, outreach programme, 87C
University of Leeds, National Historic Landmark, 116C
University of Surrey, undergraduate research programme, 140
University of York Science Education Group, *Science for the 21st century*, 33C, 88C
University research, 30C, 31C
University tuition fees, 2C, 144C
US science education, 61, 142C

Web-based learning, students' views on, 138
Web watch, 10C, 37C, 81, 94C, 134, 148C
Widening participation in HE, 2C, 31C, 58C
Whitesides report, international review of chemistry, 31C, 115C
Witch bottle, chemical analysis of, 97
Wüthrich, Kurt, Nobel prizewinner, 4C

Key

C – Column; L – Letter to the editor
